

# Electric Guardrail Control

## MEMBRANE SWITCH

### Standard configurations:

Completely customizable, the Electric Guardrail Control can be designed in any shape and size to better adapt to the bed guardrail. Not only, the membrane switch panel interface and button functions can also be personalized to better answer to the customer needs.

Power supply and charge LED indicators are available, as also One-click lock/unlock and CPR buttons. Easy to install, it is compatible with all Dewert control boxes.
